WORK EXPERIENCE

Web Designer

2016 - 2016

Freelancer - Clark Alford

Various independent freelance projects while specializing in front end development. My tools of choice are Adobe Fireworks and Pure Framework with Adaptive Images and Responsive Typography. When developing on the back end I prefer CodeIgniter and Fuel CMS for the end user. I also can build sites using Wordpress or Drupal and I'm great at customizing templates. I'm able to work solo or in a team environment. Have a project in mind; contact me and let's discuss it.
